

# Compressed Air System Packages

## Features

Glenco Air & Power has assembled an exclusive suite of industrial compressed air system packages that offer a convenient and efficient single-source solution. Each unique combination has been carefully selected from an extensive range of ALMiG compressed air equipment to provide the best combination of performance, reliability, safety and value for money.

## Professional Package

This is the recommended minimum standard for industrial applications. It comprises an oil-lubricated compressor, receiver tank, refrigerant dryer and two stages of filtration. The clean and dry compressed air is suitable for pneumatic tools, air powered machinery, abrasive blasting, powder coating and spray painting.

## Convenience

A single point of contact for selection, purchase and lifetime back-up support of the compressed air equipment package.

## Safety

All of the equipment complies with Australian Workplace Health and Safety Regulations for industrial use.

## Performance

The individual equipment items have been performance matched with one another to ensure correct function.

## Flexibility

The packages can be readily enhanced with additional or upgraded components to suit any special application requirements.
